

dreamer's couch

Dreamer's couch is more like a story character than a piece of furniture. Its unconventional forms and vibrant colors really drive your imagination – each of us can see something different while looking at this model: a rainbow, a colorful fountain, petals of an exotic plant...

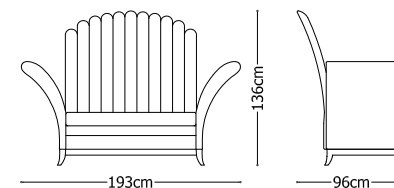

Its design combines the elegance of Renaissance with a modern touch. By the way, it has enough space for the other dreamer as well.

| 2013 | designer Indra Marcinkeviciene |
